Summary Statistics

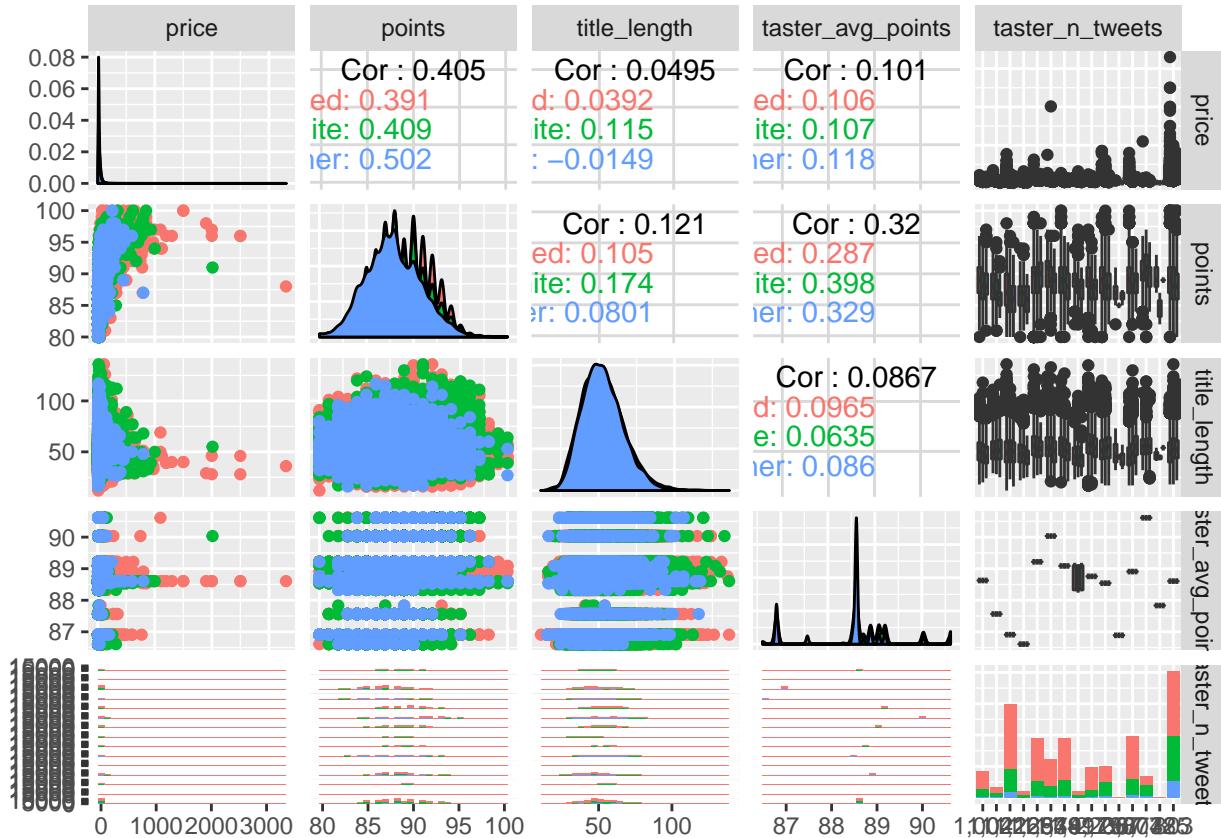

Need to figure out a way to get this to look good on pdf

```
table_one <- tableby(point_cat ~ ., data = wine_data_clean %>% select(c("price", "points", "point_cat",  
#summary(table_one, title = "Wine Data by Country")
```

Including Plots

You can also embed plots, for example:

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.  
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.  
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.  
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
